

## DZIAŁ IV POWIERZCHNIA I LUDNOŚĆ

### Uwagi ogólne

1. Tablice działu opracowano na podstawie:
  - 1) wyników Narodowego Spisu Powszechnego Ludności i Mieszkań z 20 V 2002 r. i z 31 III 2011 r.;
  - 2) bilansów stanu i struktury **ludności** na terenie gminy. Bilanse ludności sporządza się dla okresów międzypisowych w oparciu o wyniki ostatniego spisu powszechnego (z wyjątkiem danych dla lat 2000–2001 oraz 2010 r. – patrz ust. 2 przy uwzględnieniu:
    - a) zmian w danym okresie spowodowanych ruchem naturalnym (urodzenia, zgony) i migracjami ludności (zameldowania i wymeldowania na pobyt stały z innych gmin i z zagranicy), a także przesunięciami adresowymi ludności z tytułu zmian administracyjnych,
    - b) różnicy między liczbą osób zameldowanych na pobyt czasowy ponad 3 miesiące (do 2005 r. – ponad 2 miesiące) na terenie gminy a liczbą osób czasowo nieobecnych, która stanowi jednocześnie różnicę między liczbą osób zameldowanych na pobyt stały w gminie a liczbą osób mieszkających na terenie gminy;
  - 3) rejestrów Ministerstwa Spraw Wewnętrznych – o migracjach wewnętrznych i zagranicznych ludności na pobyt stały (od 2006 r. źródłem tych danych jest rejestr PESEL – Powszechny Elektroniczny System Ewidencji Ludności);
  - 4) sprawozdawczości urzędów stanu cywilnego – o zarejestrowanych małżeństwach, urodzeniach i zgonach;
  - 5) sprawozdawczości sądów okręgowych – o prawomocnie orzeczonych separacjach i rozwodach.
2. **Dane o ludności** (według stanu w dniu 30 VI i 31 XII) oraz współczynniki demograficzne, a także przeliczenia na 1 mieszkańca (1000 ludności itp.) opracowano – jeśli nie zaznaczono inaczej – przyjmując jako bazę wyjściową:
  - dla lat 2000–2009 – wyniki Narodowego Spisu Powszechnego Ludności i Mieszkań 2002 (dla lat 2000–2002 zastosowano podział administracyjny kraju obowiązujący według stanu w dniu 31 XII 2002 r.; dla pozostałych lat – każdorazowy podział administracyjny);
  - od 2010 r. – wyniki Narodowego Spisu Powszechnego Ludności i Mieszkań 2011 (dla lat 2010 i 2011 zastosowano podział administracyjny z dnia 31 XII 2011 r.).

## CHAPTER IV AREA AND POPULATION

### General notes

1. Chapter tables were compiled on the basis of:
  - 1) the results of the Population and Housing Census as of 20 V 2002 and 31 III 2011;
  - 2) the balances of the size and structure of the **population** in a gmina. Population balances are compiled for periods between censuses on the basis of the last census (with the exception of data for 2000–2001 and 2010 – see item 2, taking into account:
    - a) changes in a given period connected with vital statistics (births, deaths) and migration of the population (registering and cancelling registration for permanent residence from other gminas and from abroad) as well as address changes of the population due to changes in the administrative division,
    - b) the difference between the number of people registered for temporary stay above 3 months (until 2005 for a period of more than 2 months) in a gmina and the number of people temporary absent, which simultaneously makes the difference between the number of people registered for permanent residence in a gmina and the number of people living in the gmina;
  - 3) the registers of the Ministry of the Interior on internal and international migration of population for permanent residence (since 2006 the source of this data is PESEL register – Common Electronic System of Population Register);
  - 4) documentation of Civil Status Offices regarding registered marriages, births and deaths;
  - 5) documentation of regional courts – regarding legally valid decisions in actions for separations and divorces.
2. **Data about population** (as of 30 VI and 31 XII) as well as demographic rates and indicators per capita (per 1000 population etc.) were compiled – unless otherwise stated – on the basis:
  - for 2000–2009 – of the results of the Population and Housing Census 2002 (for 2000–2002 there was applied the administrative division of the country obligatory as of 31 XII 2002; for remaining years – on administrative division in force at a given moment);
  - since 2010 – of the results of the Population and Housing Census 2011 (for 2010 and 2011 was applied the administrative division of the country obligatory as of 31 XII 2011).

3. W tablicach o stanie ludności wprowadzono następujące grupowania:

**Ekonomiczne grupy wieku:**

- wiek przedprodukcyjny – mężczyźni i kobiety w wieku 0–17 lat,
- wiek produkcyjny – mężczyźni w wieku 18–64 lata, kobiety w wieku 18–59 lat:
  - wiek mobilny (18–44 lata mężczyźni i kobiety),
  - wiek niemobilny (45–64 lata mężczyźni i 45–59 lat kobiety),
- wiek poprodukcyjny – mężczyźni w wieku 65 lat i więcej oraz kobiety w wieku 60 lat i więcej.

Przez ludność w wieku nieprodukcyjnym rozumie się ludność w wieku przedprodukcyjnym oraz ludność w wieku poprodukcyjnym.

**Biologiczne grupy wieku:**

- 0–14 lat – dzieci,
- 15–64 lata – dorośli bez osób starszych,
- 65 lat i więcej – osoby starsze.

**Edukacyjne grupy wieku:** 3–6, 7–12, 13–15, 16–18, 19–24 lata.

4. Dane o **ruchu naturalnym ludności** w podziale terytorialnym opracowano:

- małżeństwa – według miejsca zameldowania na pobyt stały męża przed ślubem (w przypadku, gdy mąż przed ślubem mieszkał za granicą, przyjmuje się miejsce zameldowania żony przed ślubem);
- separacje – według miejsca zamieszkania osoby wnoszącej powództwo (w przypadku, gdy osoba wnosząca powództwo mieszka za granicą, przyjmuje się miejsce zamieszkania współmałżonka; w przypadku zgodnego wniosku stron przyjmuje się miejsce zamieszkania męża). Nie są uwzględniane przypadki, gdy oboje małżonkowie w momencie wniesienia powództwa zamieszkiwali za granicą;
- rozwody – według miejsca zamieszkania osoby wnoszącej powództwo (w przypadku, gdy osoba wnosząca powództwo mieszka za granicą, przyjmuje się miejsce zamieszkania współmałżonka). Nie są uwzględniane przypadki, gdy oboje małżonkowie w momencie wniesienia powództwa zamieszkiwali za granicą;
- urodzenia – według miejsca zameldowania na pobyt stały matki noworodka;
- zgony – według miejsca zameldowania na pobyt stały osoby zmarłej.

Dane o **małżeństwach** uwzględniają związki małżeńskie zawarte w formie przewidzianej prawem w urzędach stanu cywilnego. Na mocy ustawy z dnia 24 VII 1998 r. (Dz. U. Nr 117, poz. 757) w urzędach stanu cywilnego rejestrowane są także małżeństwa podlegające prawu we wewnętrznemu Kościoła lub Związku Wyznaniowego zawarte w obecności duchownego. Małżeństwo zawarte w tej formie podlega prawu polskiemu i pociąga za sobą takie same skutki cywilnoprawne, jak małżeństwo zawarte przed kierownikiem urzędu stanu cywilnego.

3. In tables on the size of population following groupings were added:

**Economic age groups:**

- pre-working age – males and females aged 0–17,
- working age – males, aged 18–64, and females, aged 18–59:
  - mobility age (18–44 males and females),
  - non-mobility age (45–64 males and 45–59 females),
- post-working age – 65 and more for males and 60 and more for females.

Population of non-working age group is understood as population in pre-working age and population in post-working age.

**Biological age groups:**

- 0–14 – children,
- 15–64 – adults excluding elderly people,
- 65 and more – elderly people.

**Educational age groups:** 3–6, 7–12, 13–15, 16–18, 19–24.

4. Data regarding the **vital statistics** according to territorial division were compiled as follows:

- marriages – according to the husband's place of permanent residence before the marriage (in cases when the husband lived abroad before the marriage, the wife's place of residence before the marriage is used);
- separations – according to the plaintiff's place of residence (in case when person filling petition residing abroad, place of residence of a spouse has been taken; in cases unanimous petition of both of persons – residence of husband is used). Data exclude divorces in which both spouses were living abroad at the moment of filling petition for separation;
- divorces – according to the plaintiff's place of residence (in case when person filling petition residing abroad, place of residence of a spouse has been taken). Data exclude divorces in which both spouses were living abroad at the moment of filling petition for divorces;
- births – according to the mother's place of permanent residence;
- deaths – according to the place of permanent residence of the deceased.

The data on **marriages** refers to marriages contracted according to lawful rules at the civil status offices. On the basis of the Law dated 24 VII 1998 (Journal of Laws, No. 117, item 757) in the local civil status offices in Poland are registered all marriages, including those based on the internal law of the Churches or the Religious Associations. Marriages contracted (on the basis of canon law marriages) subordinate the civil Polish laws and induce due to the same civil and law consequences as marriages contracted in the local civil status offices.

**Przyrost naturalny ludności** stanowi różnicę między liczbą urodzeń żywych i zgonów w danym okresie.

Przez **niemowlęta** rozumie się dzieci w wieku poniżej 1 roku.

Informacje o urodzeniach i zgonach (w tym zgonach niemowląt) prezentowane są zgodnie z kryteriami definicji urodzenia i zgonu noworodka rekomendowanej przez Światową Organizację Zdrowia.

5. Przy opracowywaniu danych o **zgonach według przyczyn** przyjęto wyjściową przyczynę zgonów. Za przyczynę wyjściową uważa się chorobę stanowiącą początek okresu chorobowego, który doprowadził do zgonu albo uraz czy zatrucie, w wyniku którego nastąpił zgon.

6. Dane o **migracjach wewnętrznych ludności** opracowano na podstawie informacji ewidencyjnych gmin o zameldowaniach osób na pobyt stały. Informacje te nie uwzględniają zmian adresu w obrębie tej samej gminy (miasta), z wyjątkiem gmin miejsko-wiejskich, dla których został zachowany podział na tereny miejskie i wiejskie.

7. Dane o **migracjach zagranicznych ludności** na pobyt stały opracowano na podstawie informacji ewidencyjnych gmin o zameldowaniu osób przyjeżdżających do Polski na pobyt stały (imigracja) oraz o wymeldowaniach osób wyjeżdżających z Polski za granicę na stałe (emigracja).

8. Napływ ludności obejmuje zameldowania na pobyt stały, odpływ – wymeldowania ze stałego miejsca zamieszkania.

9. Współczynniki dotyczące ruchu naturalnego i migracji ludności w podziale terytorialnym obliczono jako iloraz liczby faktów określonego rodzaju i liczby ludności według stanu w dniu 30 VI; do 2009 r. – ludności zameldowanej na pobyt stały według stanu w dniu 30 VI.

10. Liczbę ludności na 1 km<sup>2</sup> w przekroju jednostek podziału terytorialnego obliczono, w celu uzyskania dokładniejszego wyniku, na podstawie danych o powierzchni wyrażonej w hektarach.

**Natural increase of the population** means the difference between the number of live births and deaths in a given period.

**Infant** is a child under the age of 1 year.

Information on births and deaths (including infant deaths) is presented according to criteria of the definition of infant births and deaths recommended by the World Health Organization (WHO).

5. Compiling data on **causes of deaths**, an initial cause of death was assumed. An initial cause of death is defined as a disease that occurred at the beginning of an illness period and led to death or as an injury or poisoning that resulted in death.

6. Data regarding **internal migration of the population** were compiled on the basis of gmina documentation regarding the registration for permanent residence. This information does not include changes of address within the same gmina (town), with the exception of urban-rural gminas for which the division into urban and rural areas has been kept.

7. Data regarding **international migration of the population** for permanent residence were compiled on the basis of gmina documentation regarding the registration of people arriving to Poland for permanent residence (immigration) as well as deregistration of people leaving Poland for permanent residence abroad (emigration).

8. The inflow of the population includes registrations of arrival for permanent residence, outflow – registrations of departure from permanent residence.

9. Rates concerning vital statistics and migration of the population according to territorial division were calculated as the ratio of the number of defined events to the number of population as of 30 VI; to 2009 – registered for permanent residence as of 30 VI.

10. In order to receive more precise results, the number of population per km<sup>2</sup> in the breakdown of units of territorial division was calculated on the basis of data concerning an area measured in hectares.
